

Zurich, February 2012

ACT Currency Partner in 20 years: From single currency manager to global macro specialist. In 2011, the ACT Alpha Fund advanced by 22%.

In the course of 20 years in currency management, ACT has earned the trust of professional clients such as ABB, Pirelli, Den Norske Bank, and a number of other well-known companies. The focus at ACT is and has always been to minimize and control the downside risk in all scenarios with the aim of generating added value for discerning clients.

ACT has succeeded in implementing complementary business models without compromising the focus on alpha.

Today, ACT has a staff of 6 investment professionals who in addition to alpha generation also make their know-how available to a prominent family office. Its owner noted: "Instead of hiring two option specialists myself, I enjoy the service provided by ACT. I also appreciate the anonymity policy and the firm's transparent way of doing business with my office." With an annual volume of USD 60 billion, ACT has the critical mass needed to be an interesting partner for all banks involved.

The ACT Board of Directors has resolved to more strongly weight precious metals with alpha, execution, and options for 2012. Thus, ACT recently appointed a further board member with profound precious metals market know-how.

In 2011, ACT successfully pursued its growth strategy and positioned itself as an attractive partner for alpha talent and relationship managers with an existing client base. ACT's ambition is to provide the best platform for alpha traders and to offer its clients added value in the form of alpha, risk management, and/or execution services. To further boost client confidence, ACT will subject itself directly to FINMA supervision in 2012.
